

- COVID 19 Safety Procedures for in Person Sessions -

In the wake of the COVID 19 pandemic, SMILE has opted to implement safety procedures for our therapists and clients to ensure that safety remains a top priority for our practice.

All “In Person” sessions will abide by the following safety precautions recommended by the CDC:

1. Any client or therapist who is showing symptoms of illness will be required to reschedule their appointments, or opt for a tele-health appointment.
2. Clients and therapists are required to wear a safety mask that covers their nose and mouth for the duration of the time they are in SMILE’s offices.
3. Clients will be required to wash hands upon arrival to SMILE’s offices.
3. Clients and therapists will maintain a safety distance of 6ft (2 arms lengths) at all times.
4. SMILE staff is required to disinfect any frequently touched surfaces/areas between clients.
